VUE Benefit Summary Tool Launched at Blue Cross and Blue Shield of Vermont

Coconut Creek, Florida, 2/23/2009 — Computer Solutions and Software International, Inc. (CSSI) announced that VUE Benefit Summary has been launched at BlueCross and BlueShield of Vermont (BCBSVT). Vermont's largest single health carrier and one of only three carriers operating in Vermont, BCBSVT, has embraced this new offering in the VUE Software product of insurance solutions. In an effort to educate members on comprehensive benefit plans and product information, BCBSVT chose CSSI to implement a web-accessible Benefit Summary solution, which can also be used as a sales tool with employer groups and producers.

"VUE Benefit Summary will enable BCBSVT to streamline their new and renewal business for broker sales and broker services areas. This will allow BCBSVT to be consistent on their product offering to the larger market" said Abhinav Dave, Executive Vice President at CSSI. "Our thorough understanding of the health insurance industry allowed us to quickly align the client's requirements with our solution. We are excited to extend the value of BCBSVT's investment in VUE Software."

With VUE Benefit Summary, internal BCBSVT departments; sales, group implementation, underwriting and customer service are able to generate benefit summaries for accurate product information in their daily business processes to set up and answer specific benefit information. Multiple custom summary generating options equip BCBSVT with a highly capable solution that significantly ease a previously tedious and time consuming process.

Employer groups and individual customers alike are impacted, as VUE Benefit Summary generates custom documents that outline individual benefit packages and its coverage along with variable data. The whole process is simplified, documented, and repeatable, giving control to the administrator and the management to provide similar products in the coming years depending on customer choice.

BCBSVT uses VUE Benefit Summary as a sales tool to illustrate specific benefits and their corresponding limits and cost-shares, as well as an internal tool to detail the specific benefits to its existing customers. Recalling custom templates for future usage allows customer service and sales departments to provide service with a quick turnaround time. Additionally, customer status can be monitored once the benefit summary is delivered to keep the sales team informed. Management can monitor sales team performance for evaluation purposes as well.

About Blue Cross and Blue Shield of Vermont

BlueCross and BlueShield of Vermont is the state's oldest and largest private health insurer, providing coverage for about 180,000 Vermonters. It employs over 350 Vermonters at its headquarters in Berlin and its full-service field office in Williston, and has offered group and individual health plans to Vermonters for more than 60 years. BlueCross and BlueShield of Vermont is an independent licensee of the BlueCross BlueShield Association, an association of independent BlueCross BlueShield Plans.

About CSSI and VUE Software®

VUE Software® is the product division of Computer Solutions and Software International (CSSI) dedicated to providing industry-specific business technology solutions to companies in the insurance, healthcare, and construction verticals. Because they are tailored to the needs of these particular industries, our solutions are different from one-size-fits-all performance management and compensation suites such as enterprise incentive management (EIM) and sales performance management (SPM) solutions. VUE Software's solutions allow companies to manage strategic incentive plans, automate producer administration and organize complex data and contractor policies, resulting in greater administrative efficiency and improved sales performance. For more information about VUE Software, please call 1.877.4.VUESOFT or visit www.vuesoftware.com.
