VUE Software Announces Record Growth and Momentum

Microsoft Gold Certified Partner and Compensation Management vendor to insurance and health markets announces additions to client base, new Partnership Program, and strong market interest in Microsoft Dynamics CRM-integrated offering.

Coconut Creek, FL, 06/03/2009 - VUE Software today announced record new business contracts for the first half of 2009, increasing momentum in existing markets, and new growth opportunities.

VUE Software has seen a substantial growth in client base in the first half of 2009, strengthening the company's leadership position as a premier Compensation Management vendor for the insurance and health plan markets. New client additions include several of the country's largest health, life, and P&C carriers. VUE Software is excited to partner with these organizations in moving them into the next generation of technology for managing insurance commissions and sales performance.

With core insurance health plan domain expertise, VUE Software has developed a strong direct implementation model for its line of solutions. To continue this momentum and prepare for future growth, the company will implement a Partnership Program which will foster new relationships with leading systems integrators. Premiere partners and full program details will be announced Q3 of 2009.

VUE Software has also seen a sustained interest from current clients and the broader insurance and health plan markets for CRM solutions, and has developed out-of-the-box integration with Microsoft Dynamics CRM.

The integration will prove highly valuable both to insurers seeking streamlined processes and real-time monitoring. "The economic climate demands that businesses derive greater value from their people, processes, and technology," said Brad Wilson, Microsoft's General Manager for CRM. "Microsoft Dynamics CRM and VUE Compensation Management provide a unique solution to increase operational agility for insurance organizations. Now, carriers and brokers can leverage automation in sales and marketing processes through a single CRM window with direct real-time visibility of goal attainment and its impact on commission and bonus payouts."

With a growing client base, exciting partnerships, and innovative product pipeline, VUE Software is poised for continued growth throughout 2009.

About CSSI and VUE Software®

VUE Software® is the product division of Computer Solutions and Software International (CSSI) dedicated to providing industry-specific business technology solutions to companies in the insurance, healthcare, and construction verticals. Because they are tailored to the needs of these particular industries, our solutions are different from one-size-fits-all performance management and compensation suites such as enterprise incentive management (EIM) and sales performance management (SPM) solutions. VUE Software's solutions allow companies to manage strategic incentive plans, automate producer administration and organize complex data and contractor policies, resulting in greater administrative efficiency and improved sales performance. For more information about VUE Software, please call 1.877.4.VUESOFT or visit www.vuesoftware.com.
