VUE Software Announces Marketplace Momentum for VUE Wrap-Up Management

Coconut Creek, Florida, 8/10/2010 — VUE Software today announced that it is seeing growing demand for its VUE Wrap-Up Management software, which offers advanced administrative capabilities for providers of wrap-up administration services. This success is due to a growing client base and strong customer allegiance for VUE Wrap-Up Management. The company recently gained one of the top Independent Property and Casualty Insurance Agencies in the country and renewed 100 % of existing contracts for VUE Wrap-Up Management.

The solution caters to the requirements of construction organizations and P&C insurance brokerages who deal with controlled insurance programs (CIPS, also called “wrap-ups”). VUE Wrap-Up Management is the technology backbone for construction clients to run their wrap-up programs, and also allows brokers and administrators to provide advanced administrative services. The flexible architecture of the solution makes it highly customizable to each individual client’s needs. The solution automates the entire administration process, including enrollment, certificates, policy and safety information, and reporting for administrators, contractors and building owners.

“More clients are seeking us out because they want a reliable technology partner that can provide a proven solution as well as a deep bench of specialized professionals who can customize the product to their needs. Rather than making large up-front capital outlays and taking 12-24 months building a custom solution from scratch, they can be up and running with a custom version of VUE Wrap-Up Management for a fraction of the cost in as little as 90 days,” said Stephen Bruno, President and CEO of VUE Software. “Clients who want a plug-and-play, cost effective solution can also opt for the classic product with no customizations and be in business managing wrap-ups in 30 days or less.”

VUE Wrap-Up Management is hosted by VUE Software and is provided via a secure web connection. The solution is the most powerful and technologically advanced product of its kind on the market. VUE Wrap-Up Management provides the opportunity for wrap-up administration agencies to deliver higher quality services and manage a larger client base. Contractors with available personnel can also use the product to manage their wrap-up programs in-house, and brokers who are currently not offering administration services can begin to do so with the support of the solution.

About VUE Software®

VUE Software® is the product division of Computer Solutions and Software International (CSSI) dedicated to providing industry-specific business technology solutions to companies in the insurance, healthcare, and construction verticals. Because they are tailored to the needs of these particular industries, our solutions are different from one-size-fits-all performance management and compensation suites such as enterprise incentive management (EIM) and sales performance management (SPM) solutions. VUE Software’s solutions allow companies to manage strategic incentive plans, automate producer administration and organize complex data and contractor policies, resulting in greater administrative efficiency and improved sales performance.
