

VUE Benefits Manager is a comprehensive web-based benefit management solution which automates enrollment, benefits selection and subscriber communications for employers and carriers.

Intuitive Interface that Streamlines Benefits

VUE Benefits Manager provides an easy-to-use and customizable user interface that provides a comfortable experience for both employers and employees. Human Resource administrators and their employees can interact simply and easily across one unified system.

Web-based interface provides flexibility for users to manage benefits from work or home.

Designed to be user-friendly, VUE Benefits manager makes the enrollment process straightforward.

Self-Service, Better Service

Users are guided through the enrollment stages in a wizard fashion simplifying the enrollment process promoting group satisfaction and retention while enforcing standards and supporting HIPAA compliance.

Paperless Processing

A simple browser-based interface makes it easy to simplify the enrollment experience - offering interactive guidance and branching that far exceeds the capabilities of paper forms. This approach dramatically cuts enrollment processing costs by reducing errors and service calls.

Reduced Service Costs

Form pre-population and validation make it easy for users to manage the enrollment process directly while virtually eliminating data-entry errors. Accurate data means faster processing and helps to avoid costly quality reviews.

24/7 Availability

Internet accessibility provides flexibility to users allowing them to connect easily to the system from work or home. A proven technology platform ensures scalability and availability for around-the-clock access.

Value

VUE Benefits Manager helps deliver rapid return on investment for new business projects through:

- Improved profitability – Equip group administrators with the tools needed to drive customer satisfaction and retention
- Increased organizational responsiveness – Provide real-time access to individual data without costly customer service calls
- Reduced operations costs – Eliminate human errors in processing through comprehensive automation and auditing
- Improved security and audit controls – Secure login and full support for HIPAA rules and regulations.

Technology

VUE Benefits Manager utilizes Microsoft platform technologies as the foundation for all system development providing a standard architecture to facilitate enterprise integration and assure cost effective implementation on commodity hardware. VUE Benefits Manager requires Microsoft SQL Server.

VUE Software is an active member in Microsoft's Insurance Value Chain (IVC) program and works closely with Microsoft to ensure leading system integration, scalability, reliability and security.

About VUE Software®

VUE Software® is the product division of Computer Solutions and Software International (CSSI) dedicated to providing industry-specific business technology solutions to companies in the insurance, healthcare, and construction verticals. Because they are tailored to the needs of these particular industries, our solutions are different from one-size-fits-all performance management and compensation suites such as enterprise incentive management (EIM) and sales performance management (SPM) solutions. VUE Software's solutions allow companies to manage strategic incentive plans, automate producer administration and organize complex data and contractor policies, resulting in greater administrative efficiency and improved sales performance.
