

VUE Wrap-Up Management™ Datasheet

VUE Wrap-Up Management is an advanced, Web-based solution for streamlining and automating the management of Owner Controlled Insurance Programs (OCIP) and Contractor Controlled Insurance Programs (CCIP).

Total Control of Program Compliance

VUE Wrap-Up Management allows administrators to capture all subcontractor details, including experience modifiers, multiple contacts, offsite coverage, and payroll reports. Automated checkpoints within the system flag delinquencies and send automated communications, to ensure total compliance and maintain accurate contractor records.

Web-based interface provides direct contractor access for form submission and notifications.

Automated letters, faxes and emails allow for proactive communication with every contractor.

Streamline Communication

With the ability to receive emails and faxes¹ directly to the system, and an optional online platform for submitting subcontractor data and forms, all subcontractor communication stays organized and paperwork is drastically reduced. Sponsors have access 24/7 for real-time reporting on program health.

Manage Liability

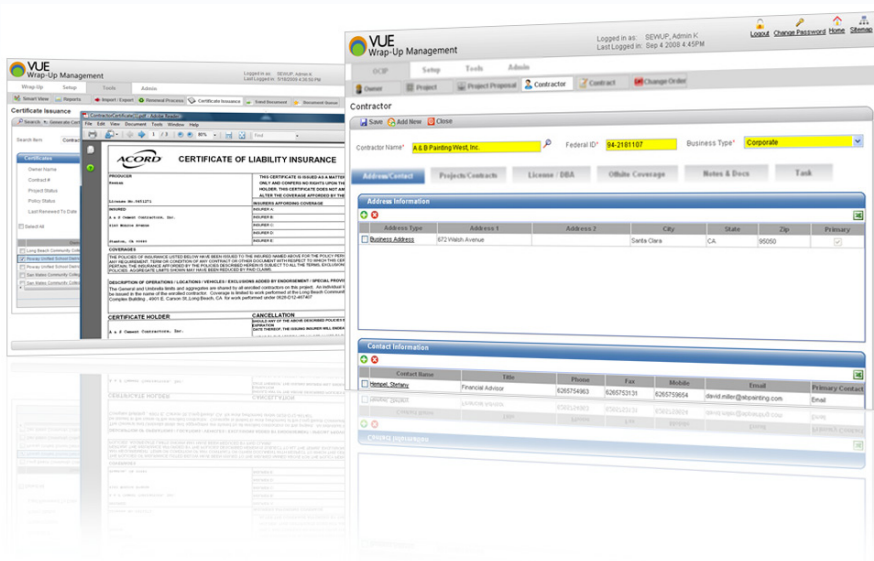

Supervise accountability with a comprehensive hierarchy view of contractors, subcontractors, and lower-tier subcontractors. Manage offsite coverage, EMR's and claims history for every subcontractor on a project.

Track and Store Paperwork

Organize documents and eliminate the need for extensive paper filing systems. Keep a history of all communications, contracts, offsite coverage certificates and other documentation for each contractor on a project.

Online Accessibility

The browser based interface makes access to VUE Wrap-Up Management and Contractor Portal easy from different locations and user groups. There is no software to install on your computers, and data is securely backed up regularly.

About VUE Wrap-Up Management

VUE Wrap-Up Management Features Include:

Workflow

- Create and assign workload tasks
- Measure task completion with comprehensive tracking and auditing

Tracking and Reporting

- SmartVUE™ technology for advanced searching and manipulating real-time data
- Export data to Excel and import outside reports
- Capture a detailed audit trail for every transaction
- Add or create reports with ease
- Automatically generate certificates
- Automatically calculate credits

Document management

- Create, store and send letters and certificates
- Send documents via email or fax¹
- Track and archive correspondence

Product/Carrier Management

- Manage multiple carriers
- Adhere to carrier/policy-specific business rules

Underwriting Module

- Create business proposals
- Record claims for a contract

Claims/Loss Control Module

- Upload and record claims for every contract
- Calculate loss ratio by project

Scanning Module

- Scan and save document images
- Link images to project, contractor or both

Value

VUE Wrap-Up Management delivers a cost effective solution for OCIP/CCIP management through:

- **Productivity gains** - streamlined processes allow for less time and energy spent on internal operations
- **Improved contractor relations** - communicate easier and more often using automated methods
- **Reduced operations costs** - Automate tracking and reporting reducing costly human errors
- **Control liability** - Proactively monitor situations and solve problems before they start

Technology

VUE Wrap-Up Management utilizes Microsoft platform technologies as the foundation for all system development providing a standard architecture to facilitate system upgrades and interfaces with other systems. VUE Wrap-Up Management works with all Standards based interfaces (XML, Web Services, ACORD, text) and Microsoft Internet Explorer.

VUE Software is an active member in Microsoft's Insurance Value Chain (IVC) program and works closely with Microsoft to ensure leading system integration, scalability, reliability and security.
